

introducing

We've listened to you! Introducing Redback Chefs, technologically advanced footwear tailor made for the service industry. Designed for comfort and safety when spending long hours on your feet on wet or slippery floors. Featuring the amazingly innovative ChefGrip® technology sole.

It's hard enough remembering the 'Specials of the day' and to always give that 'service with a smile' but it's even harder when your feet are killing you. Long hours in a kitchen, behind a bar, espresso machine or serving tables takes its toll.

Whether you're a Chef, barista, concierge or waiter one thing you all have in common is spending long punishing hours on your feet.

You wanted something that looks good, gives comfort and support for hours, with the protection of a work boot, the style of a dress shoe plus the fit of an athletic shoe.

We heard you and we've delivered. Redback Chefs offer a range of styles to suit the wide range of professions in the service industry. Shoes that are as professional as you are.

## THANKFULLY SOME THINGS NEVER CHANGE

- CLASSIC COMFORT
- CLASSIC FIT
- FAMOUS ANATOMIC SUPPORT
- FAMOUS QUALITY

## SUPPORTING AUSTRALIA'S WORKFORCE

S I N C E 1 9 8 9

thanks

When we started in 1989 we couldn't have believed that within a decade Redback would become a leader in the Australian and New Zealand market and be exporting to over twenty countries around the world. Redback is also world-renowned for its High Performance and Special Purpose Protective Boots. Our Combat, Police, Fire-Fighting, Rescue and Steel Makers boots are worn on every continent.

Hundreds of thousands of Australian workers keep coming back for the famous Redback Comfort and Reliability. And by the way our work boots are still genuinely 100% Australian made. Your support keeps jobs here and our promise is to keep sourcing the best local hides, and with our dedicated craftsmen,

make the tried and true boots that keep delivering comfort and quality. True to our heritage every product we make combines intelligent design with technological innovation. Australian Outback inspired footwear features premium full grain leathers, state of the art materials and an attention to detail that delivers unsurpassed comfort and reliability.

Every Redback product is designed to stand up to the tests of nature as well as the tests of time. Made only using the finest materials. Redback Boots are built to take across the arid outback, a Snowy Mountain ridge top, keep out the driving rain, protect you against the biting cold, withstand the rigours of the urban environment and still outlast everything else in your closet.

100% AUSTRALIAN BOOT COMPANY

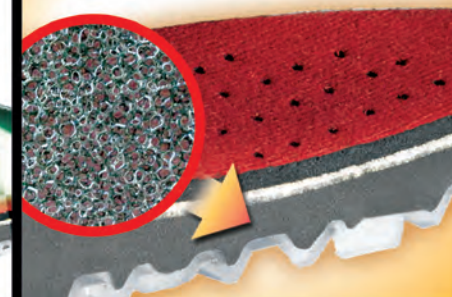

## ANATOMIC SUPPORT

Anatomic last and sole profile is designed to reduce arch flexion (sagging), subsequent foot fatigue and referred leg and back ache.

## LIGHTWEIGHT AIR CUSHION MIDSOLE

Comprising of a special compound with millions of tiny air bubbles to improve shock absorption, energy return and reduce weight.

## THICKER TOUGHER LEATHER

Our leathers are 2.5mm to 2.7mm thick, this is 20% stronger than normal work boots. The full chrome, oiled tannage means they are more resistant to hardening & cracking. Better, longer lasting, lateral stability and heel shape because of the three layer heel counter design with no rough edges.

## BETTER TRACTION

The REDBACK sole has a 30% more cleat to ground contact improving slip resistance. The extra tough compound means that even when the boots are old you still have plenty of sole cleats and grip left.

## GUARANTEED RELIABILITY

Redback's innovative High Pressure Compression moulded outsole technology delivers unparalleled physical toughness and means the lightweight midsole bonds to each leather fibre giving unequalled sole bond to upper.

## WHAT THE EXPERTS SAY:

"The Redback sole technology and wedge design profile enables the support structures, the tendons, ligaments, muscles and bony elements of the foot to minimise fatigue and assist the foot to provide a stable platform for the working foot. The design profile and soling material helps the foot to attenuate shock at impact and guide the foot throughout mid-stance phase of the gait cycle, the most vulnerable time for the foot and leg in terms of injury.

The superior torsional stability of this footwear is maintained and this contributes to reduced tension on the plantar fascia enabling the conversion from flat foot to an effective rigid foot for propulsion."

After years of research and development Redback are proud to announce the release of the revolutionary 'Chef Grip' technology range of service industry footwear.

A World's first technology - combining Slip Resistant Gum Rubber Tread, a Tough TPU polymer Outsole Shell with a lightweight, shock absorbing PU wedge midsole

## CREATING A SAFER WORKPLACE:

Independent NATA Laboratory tests proved the 'Chef Grip technology' exceeded the International Standard for Slip Resistance by over 400% (Testing Coefficient of Friction on a Ceramic tile covered with Glycerine to DD EN 13287)
